I am a Licensed Nurse turned Web Developer with a love for problem solving and people. As a self-taught web developer, I am a tireless learner and love broadening my skill set.

SKILLS:

Frontend: HTML, CSS, Bootstrap, Chart.js

Backend: Python, Flask, Apache

Tools: Ubuntu, Git, WordPress, DigitalOcean, Jupyter Notebook

EDUCATION:

ChiPy Mentorship Program - Mentee | 09/2016 - 01/2017

As a NBA enthusiast, I joined the Mentorship with the goal of learning Python by analyzing NBA Data. I began my project by using Jupyter Notebook to process and present CSV NBA data. I then learned about Matplotlib and its usage to chart data. Wanting to share the data, I utilized Flask and apache to launch a website. I incorporated Chart.js to replace matplotlib to make the site more visually appealing. To finish my project I documented my work with links as well as videos to share with those eager to learn.

CodeCademy | Udacity | Free Code Camp | Coursera | Edx | 09/2015 Present

To start learning how to make websites. I began with Udacity and various Mooc's to establish my foundation. I then utilized Code Academy's HTML/CSS course to create a portfolio to cement my knowledge. To expand my front-end skills further, I created and deployed a WordPress site via DigitalOcean.
